

Usability Engineering and ISO/IEC 62366 – are you compliant?

Embed a Xylotek specialist in your teams for best-practice Usability Engineering process and MDD ‘essential requirement’ regulatory compliance.

Usability engineering file?

Validation plan?

Primary operating functions?

Usability specification?

Use scenarios & goals?

Verification method?

Slip, lapse, or mistake?

Participatory design exercises?

Simulated use conditions?

We specialise in supporting early-stage Medtech and SMEs with flexible, low-cost services:

1. Use our 2-day ‘Usability Audit’ to score current compliance and highlight improvement opportunities.
2. Let us work with your designers and engineers to evolve usability process and team understanding
3. Use our experience to create all necessary documentation to fully demonstrate compliance
4. Allow us, where necessary to supplement human-factors roles on your projects to generate compelling device solutions
5. Let us facilitate high value expert reviews and user studies
